

Engineering Tools FB

OPERATION MANUAL

FB PDF Editor

Edit, sign, stamp, convert and organize PDF files on your own PC.
100% offline.

Contents

01	Introduction	What the program does, Free and Pro
02	Installing and starting	Microsoft Store, opening files
03	The screen	Ribbon, sidebar, page area
04	Viewing, finding and reading	Zoom, pages, Find
05	Comments, markup and checklists	Highlight, draw, ticks and crosses
06	Tables	Copy to Excel, calculation tables (Pro)
07	Signatures and initials	Draw, place, sign every page (Pro)
08	Stamps	Standard, custom and picture stamps (Pro)
09	Organizing pages	Reorder, rotate, insert, split, merge
10	OCR: scanned PDFs	Make scans searchable (Pro)
11	Converting and exporting	Office, images, text, create PDFs
12	Forms, protection and other tools	Forms, passwords, redaction, batch
13	Saving and printing	Save, Save As, print
14	Keyboard shortcuts	The most used keys
15	Troubleshooting and support	Common questions

This manual explains how to install and use **FB PDF Editor 1.3**, step by step. The pictures show the real program. Tools marked **PRO** need the one-time Pro upgrade from the Microsoft Store. Training slides and how-to videos are in the Download Center at engineeringtoolsfb.com/downloads.

01 Introduction

FB PDF Editor is a PDF editor for Windows that works completely offline. You can read, annotate, sign, stamp, organize, convert and print PDF files. Your files never leave your computer: there is no account, no upload and no subscription.

Who it is for

- Engineers and project teams who review, sign and stamp drawings, reports and contracts.
- Office staff who fill in forms, merge documents and print or e-mail PDFs.
- Anyone who needs to turn scanned paper into searchable text.

Free and Pro

The core editor is free, with no time limit and no watermark. A one-time **Pro** upgrade unlocks the professional tools. In the program, tools that need Pro are marked **PRO**.

Free (always)	Pro (one-time purchase)
Open, read and search PDFs, tabs, several windows, dark themes	OCR: scanned pages become searchable text in 28 languages
Highlight, underline, strike out, draw, shapes, comments, sticky notes	Signatures, initials and stamps, on one page or many
Add text, images, links, QR codes, tick and cross marks	Form builder with 12 field types and auto-detect
Fill in existing PDF forms	Tables with formulas, totals and serial numbers
Reorder, rotate, delete, insert, extract, split and crop pages	Convert PDF to Word, Excel and PowerPoint, and back
Watermarks, headers and footers, page and Bates numbers	Edit existing text, Find & Replace in the PDF
Compress, grayscale, export pages as images, text or HTML	Redaction, AES-256 password protection, sanitize
Print and save with no watermark	Batch processing, compare two PDFs, merge with cover pages

System requirements

- Windows 10 (version 1809 or later) or Windows 11, 64-bit.
- About 400 MB of free disk space. No internet connection is needed to work.

02 Installing and starting

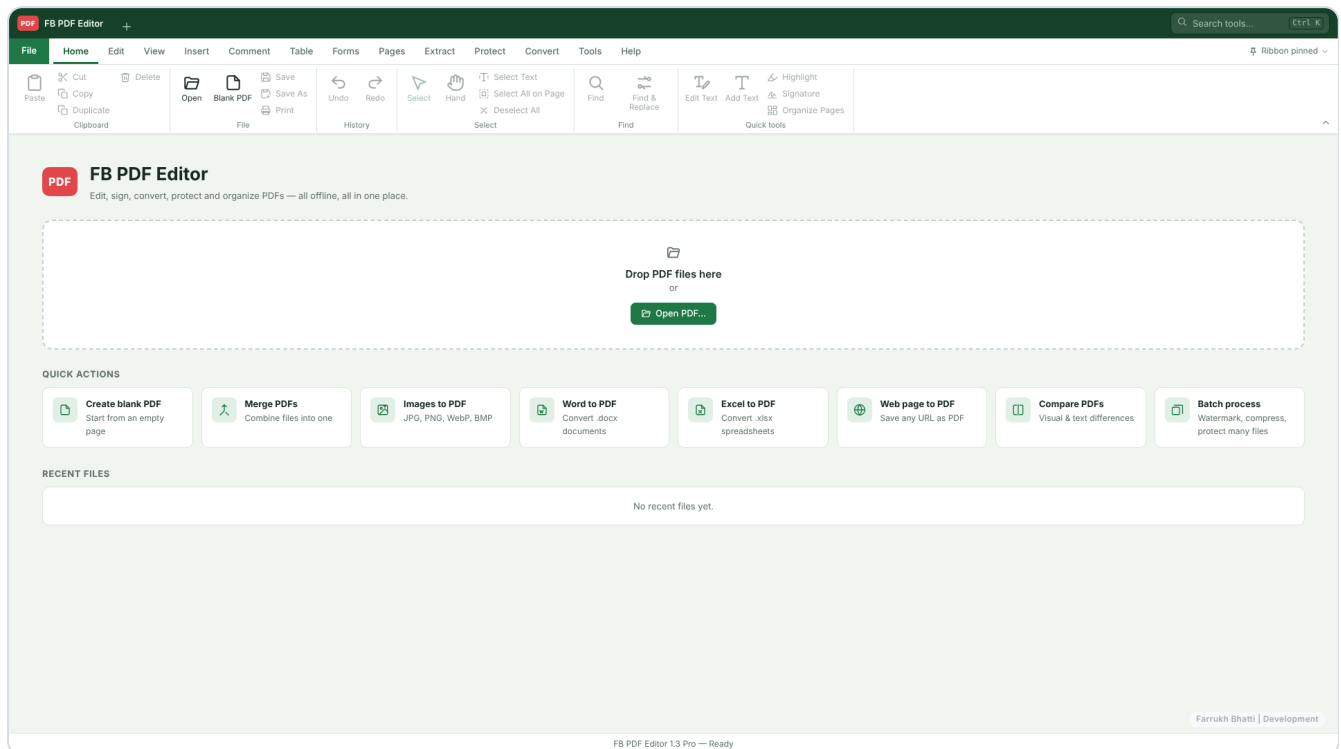

Install

- 1 Open the **Microsoft Store** and search for **FB PDF Editor**.
- 2 Click **Get** (or **Install**). Windows downloads and installs the program.
- 3 Start it from the **Start menu**, or click **Open** in the Store.

Updates arrive automatically through the Microsoft Store.

The start screen

When no file is open, the start screen offers the most common jobs: open a PDF, create a blank PDF, merge PDFs, and make a PDF from images, Word, Excel or a web page.

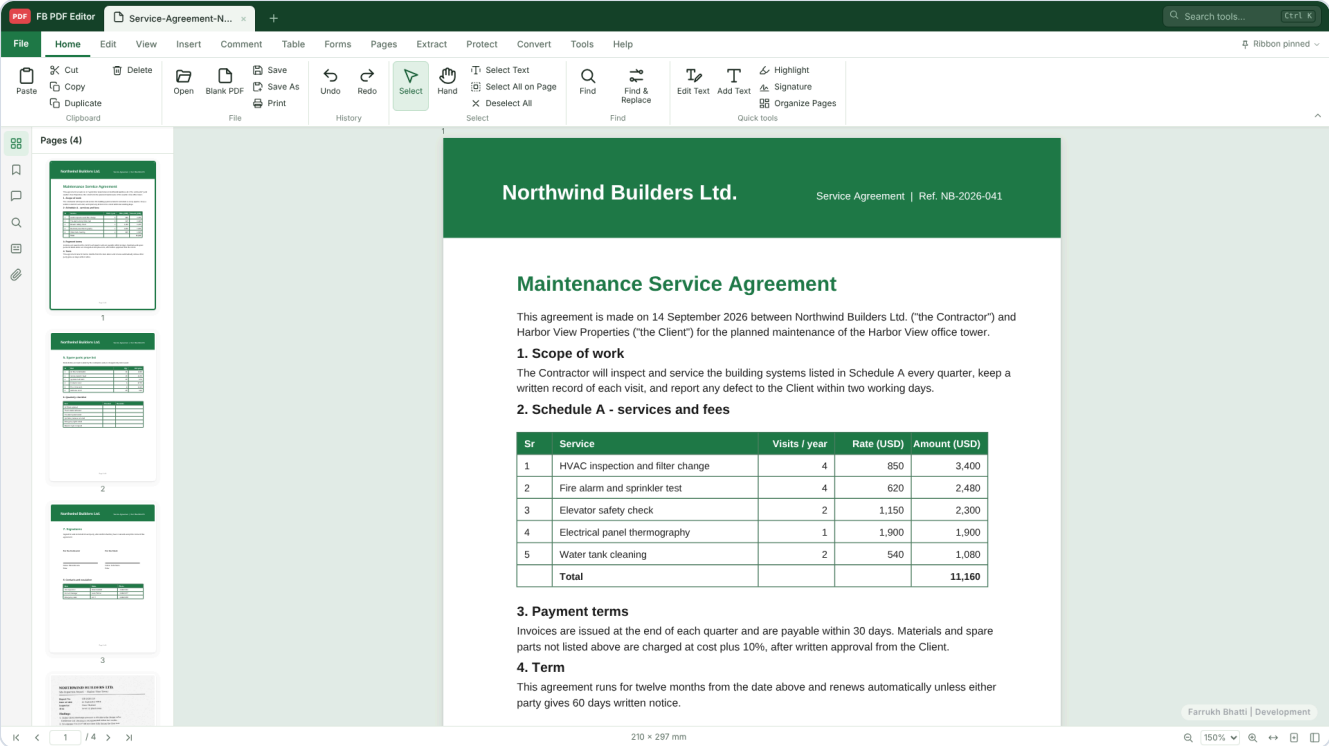

The start screen.

Opening a PDF

- Click **Open PDF...** (or press **Ctrl+O**) and choose one or more files.
- Drag PDF files from File Explorer onto the window.
- In File Explorer, right-click a PDF and choose **Open with > FB PDF Editor**.

Each file opens in its own tab at the top. Press **Ctrl+Tab** to move between tabs and **Ctrl+Alt+N** to open a new window.

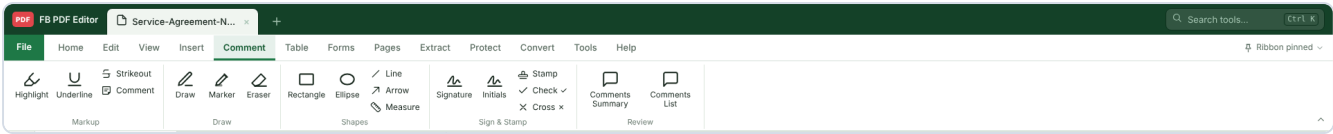

03 The screen

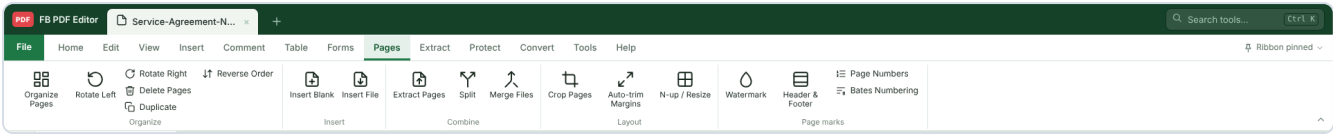

The main window with a document open.

Area	What it does
Document tabs (top)	One tab per open file. A dot on the tab means unsaved changes.
Search tools... (top right)	Type the name of any command and press Enter. Shortcut Ctrl+K .
Ribbon tabs	File, Home, Edit, View, Insert, Comment, Table, Forms, Pages, Extract, Protect, Convert, Tools and Help.
Ribbon	The tools of the chosen tab, in named groups. Buttons with ▼ open a list.
Sidebar (left)	Page thumbnails, bookmarks, comments, search results, form fields and attachments.
Page area	The document itself. Scroll, zoom and work directly on the pages.
Status bar (bottom)	Page number, page size, unsaved changes and the zoom level.

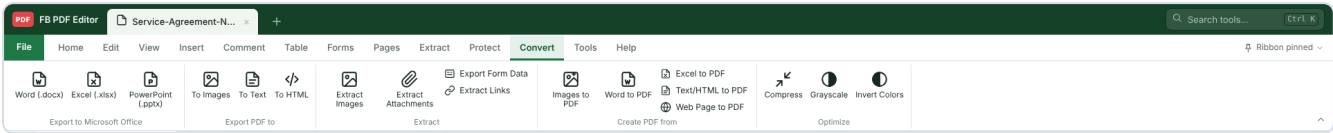

The ribbon tabs at a glance

Comment tab: markup, drawing, shapes, signature and stamps, review.

Pages tab: organize, insert, split, number and watermark pages.

Convert tab: export to Office, images, text and HTML, and create PDFs from other files.

TIP

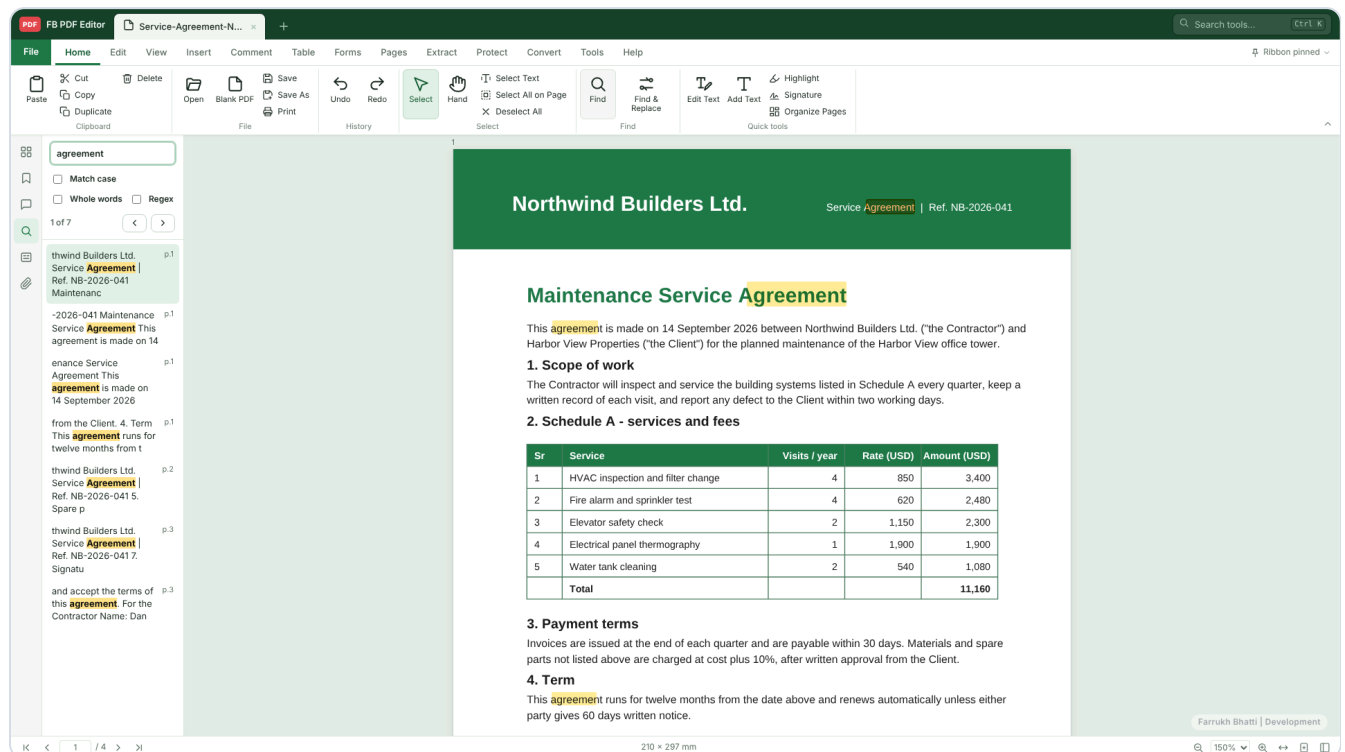

Press **Alt** to show key tips on the ribbon, and **Ctrl+F1** to pin or unpin the ribbon.

04 Viewing, finding and reading

- Zoom with **Ctrl+=** and **Ctrl+-**, or hold **Ctrl** and turn the mouse wheel.
- **Ctrl+1** fits the whole page, **Ctrl+2** fits the page width, **Ctrl+0** shows the actual size.
- Jump to a page with the box in the status bar, or press **Ctrl+Shift+N**.
- Click a thumbnail in the sidebar to go to that page.

Finding text

- 1 Click **Find** on the Home tab (or press **Ctrl+F**).
- 2 Type a word and press Enter.
- 3 Every match is listed in the sidebar with its page number. Click a result to jump to it.

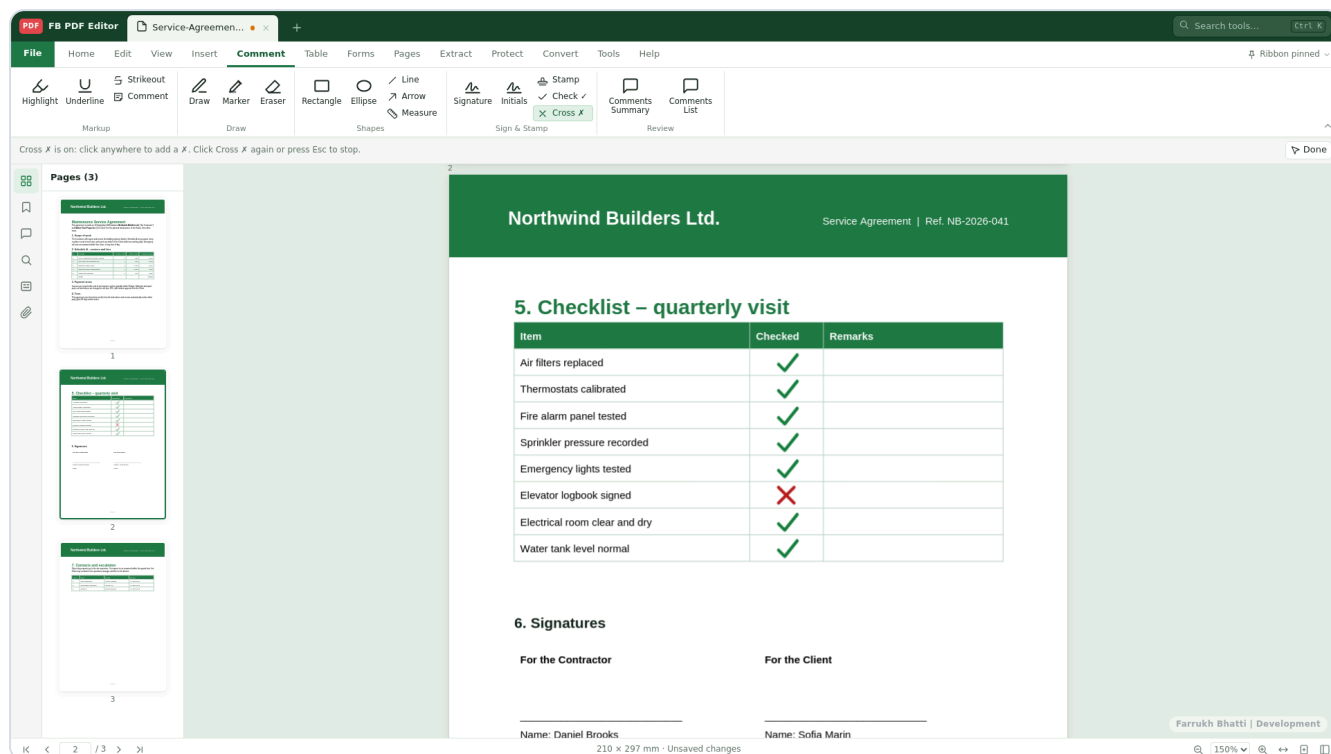

Search results in the sidebar, with the matches highlighted on the page.

Tick **Match case**, **Whole words** or **Regex** for exact searches. **Find & Replace** (**Ctrl+Shift+F**) changes text inside the PDF (Pro).

05 Comments, markup and checklists

The **Comment** tab holds the review tools. Choose a tool, then drag over text or draw on the page.

- **Highlight**, **Underline** and **Strikeout** mark text.
- **Comment** adds a sticky note. **Comments List** and **Comments Summary** show all of them.
- **Draw**, **Marker** and **Eraser** for freehand marks.
- **Rectangle**, **Ellipse**, **Line**, **Arrow** and **Measure** for shapes and dimensions.
- **Check** ✓ and **Cross** ✕ put tick and cross marks on checklists. Click on the page for each mark, and press **Esc** to stop.

Ticks and crosses on a checklist.

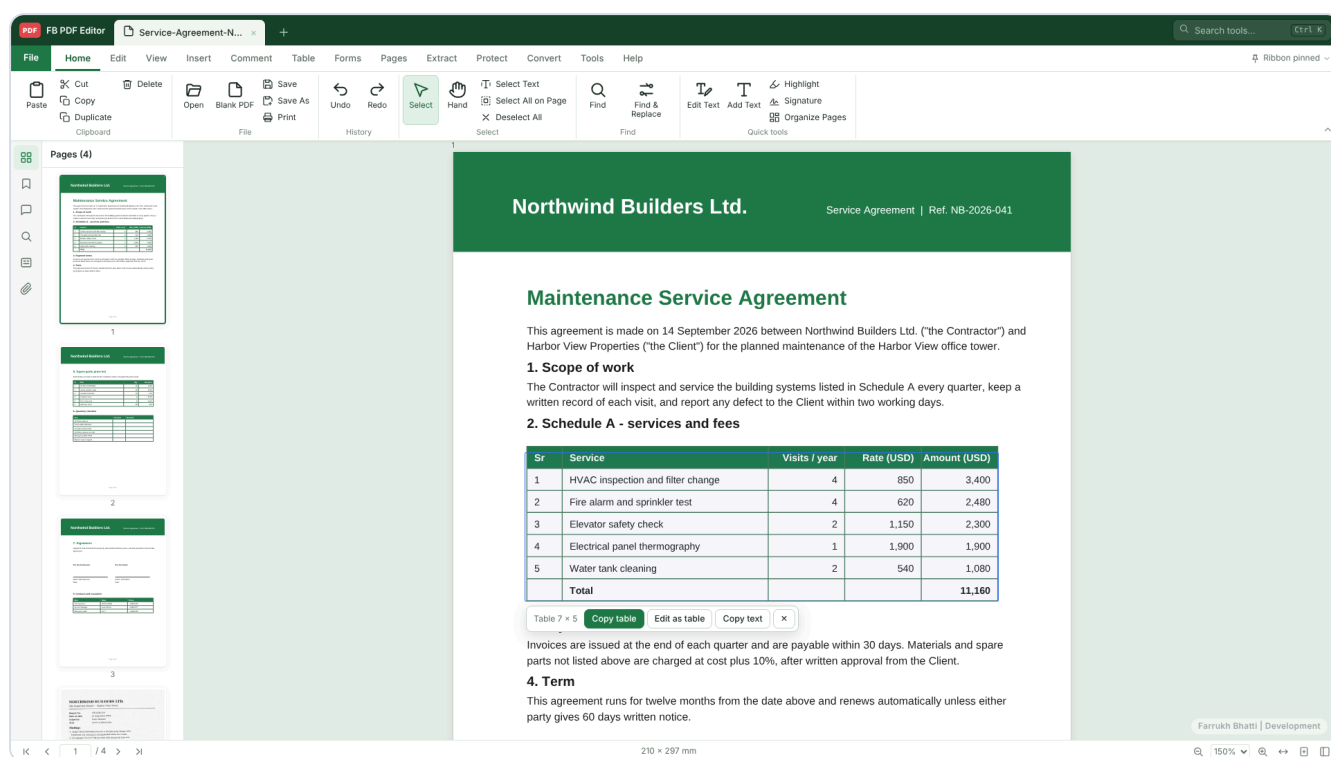

TIP Every mark stays editable. Click it to move, **Undo** (**Ctrl+Z**) freely: nothing is written to the file until you save.

06 Tables

Copy a table from a PDF to Excel or Word

PRO Inserting and editing tables, formulas and Edit as table are Pro tools.

- 1 Choose **Select** on the Home tab.
- 2 Drag a box over the table on the page. The table is recognised, and a small bar appears.
- 3 Click **Copy table**, then paste into Excel or Word. Rows, columns and numbers stay in their cells.

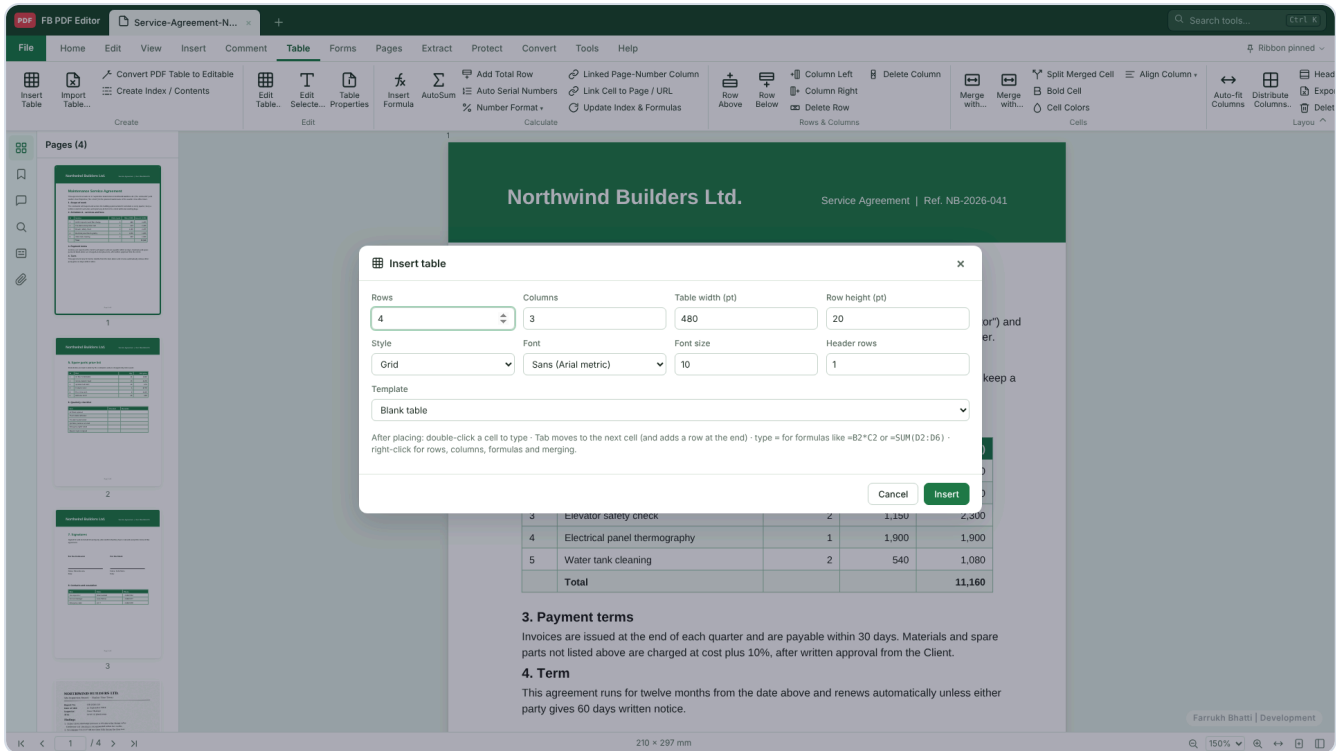

A recognised table with Copy table, Edit as table and Copy text.

Edit as table turns the printed table into an editable table in the same place. Double-click a cell to change it; right-click for rows, columns and merging.

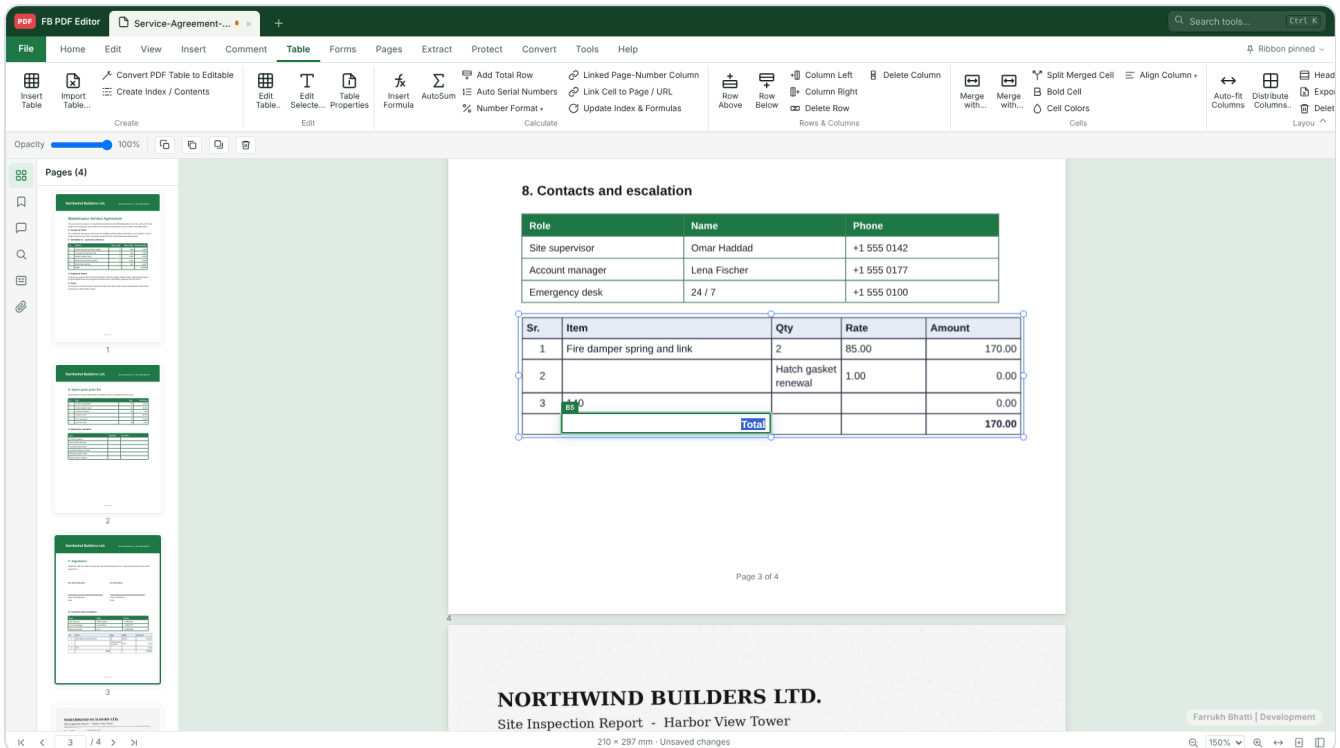

Insert a calculation table

- 1 Open the **Table** tab and click **Insert Table**.
- 2 In **Template**, choose **Calculation (Sr · Item · Qty · Rate · Amount · Total)**, then click **Insert**.
- 3 Click on the page where the table should go.
- 4 Type the item, quantity and rate. **Tab** moves to the next cell, and **Tab** on the last row adds a new row.

- 5 Amount (= Qty × Rate) and the Total work themselves out. Change a number and they update at once.

The Insert table dialog.

A calculation table on the page, with the total worked out.

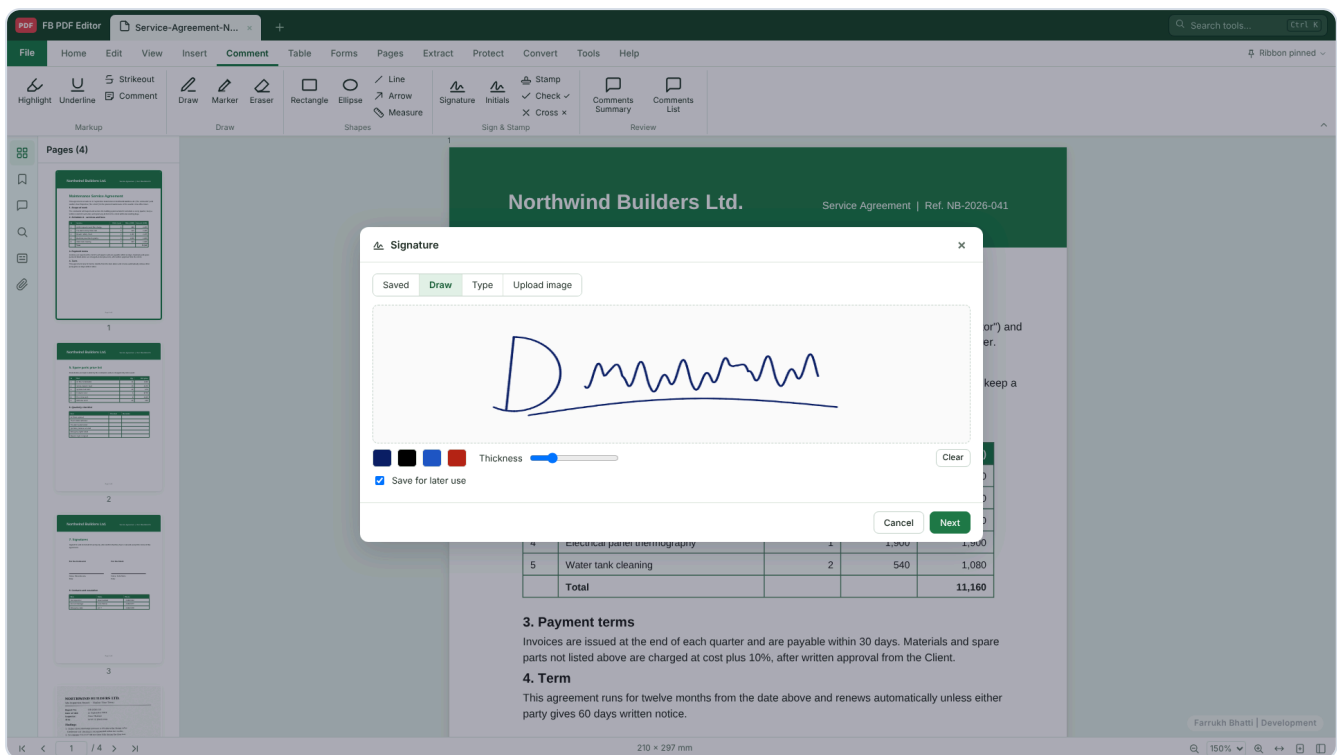

Formulas

Type a formula starting with `=` in any cell, for example `=C2*D2`, `=SUM(E2:E9)`, `=AVERAGE(C2:C5)`, `=ROUND(E2*17%,2)` or `=IF(E2>1000,"High","Low")`. Columns are A, B, C... and rows 1, 2, 3... (the header is row 1). **AutoSum**, **Add Total Row**, **Auto Serial Numbers** and **Number Format** are on the Table tab. Press `F9` to recalculate.

07 Signatures and initials

PRO Signatures and initials are Pro tools.

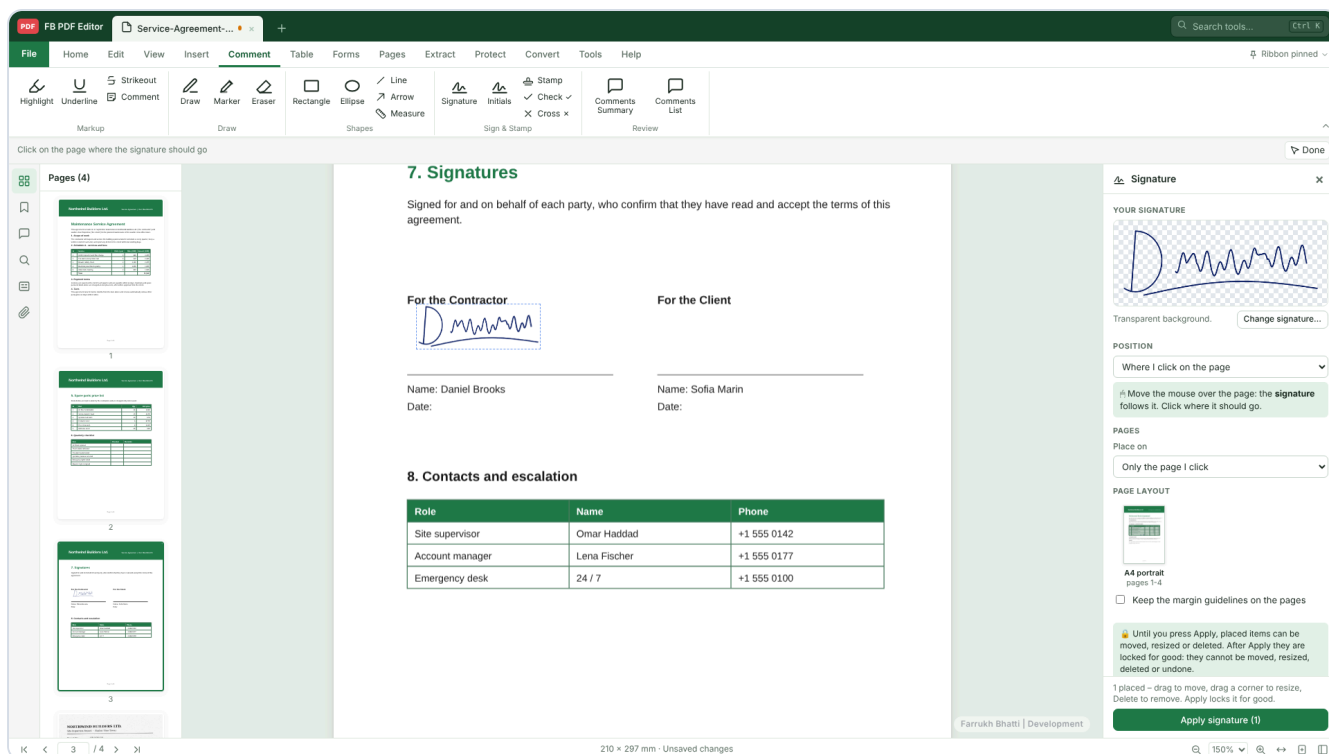

- 1 On the **Comment** tab click **Signature**.
- 2 Sign in the box with the mouse, a pen or your finger (**Draw**). You can also **Type** your name or **Upload image** of a signature. Photos get a clean, transparent background automatically.
- 3 Leave **Save for later use** ticked to keep the signature under **Saved**, then click **Next**.

Drawing a signature.

The **Signature** pane opens on the right and shows the signature live on the pages. Choose how to place it:

- **Where I click on the page:** the signature follows the mouse. Click on the signature line. Click again to place more.
- **Fixed position (page margins):** set the spot in **% of the page** (from right, from bottom, width). Choose **All pages**, **Odd**, **Even** or **Custom pages**, then click **Place on pages**.

A signature placed on the signature line.

- 1 Drag the signature to move it, or drag a corner to resize it. Right-click for Duplicate, Delete from all pages or this page only.
- 2 Click **Apply signature**. Applied signatures are locked for good: they cannot be moved, resized, deleted or undone.

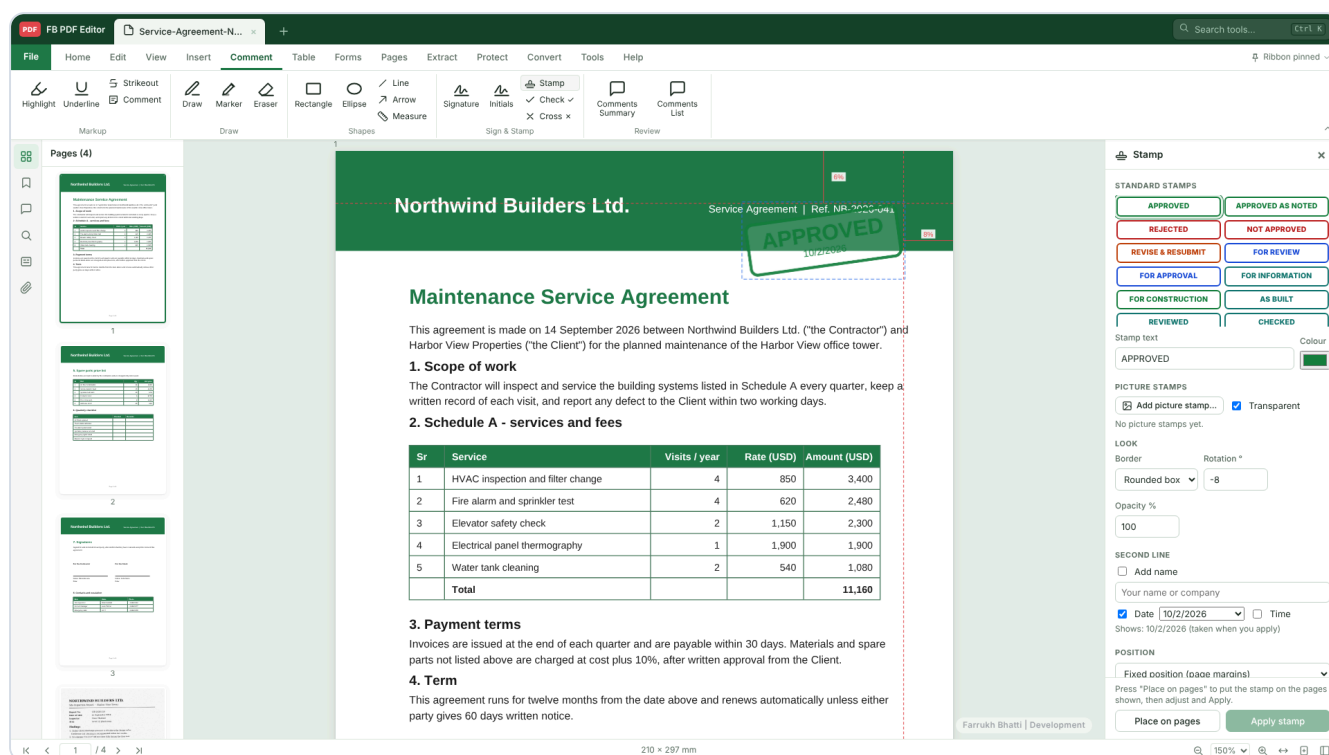

NOTE % of the page means the signature lands on the same relative spot and size on A4, A3, Letter, portrait or landscape pages.

Initials work the same way. They are useful at the bottom corner of every page.

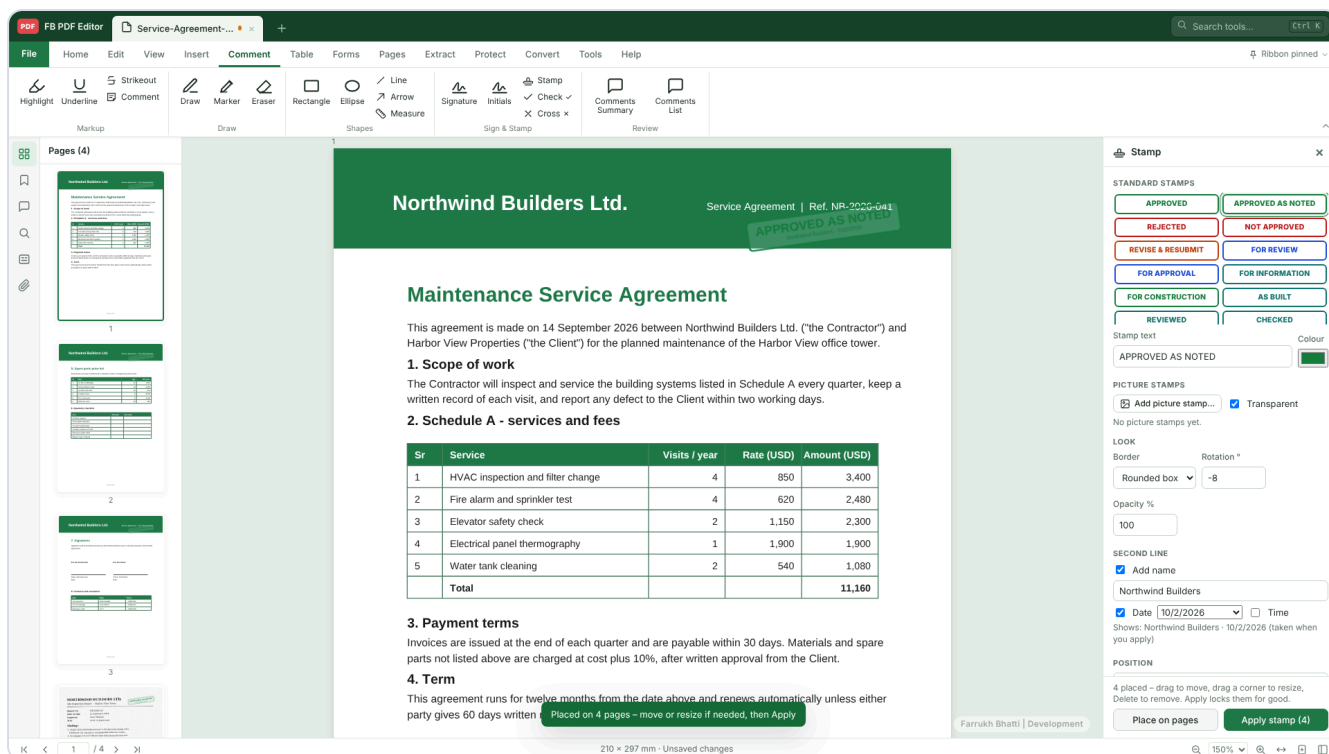

08 Stamps

PRO Stamps and picture stamps are Pro tools.

- 1 On the **Comment** tab click **Stamp**. The Stamp pane opens on the right with a live preview.
- 2 Pick one of the **26 standard stamps** (APPROVED, APPROVED AS NOTED, REJECTED, FOR CONSTRUCTION, AS BUILT, REVIEWED...), or type your own text and choose a colour.
- 3 Under **Look**, set the border, rotation and opacity.
- 4 Under **Second line**, tick **Add name** and type a name, and choose whether to add the **Date** and **Time**.
- 5 Under **Position**, set the spot in % of the page, choose **All pages** or other pages, and click **Place on pages** (or use **Where I click on the page**).
- 6 Check the stamps, then click **Apply stamp** to lock them into the PDF.

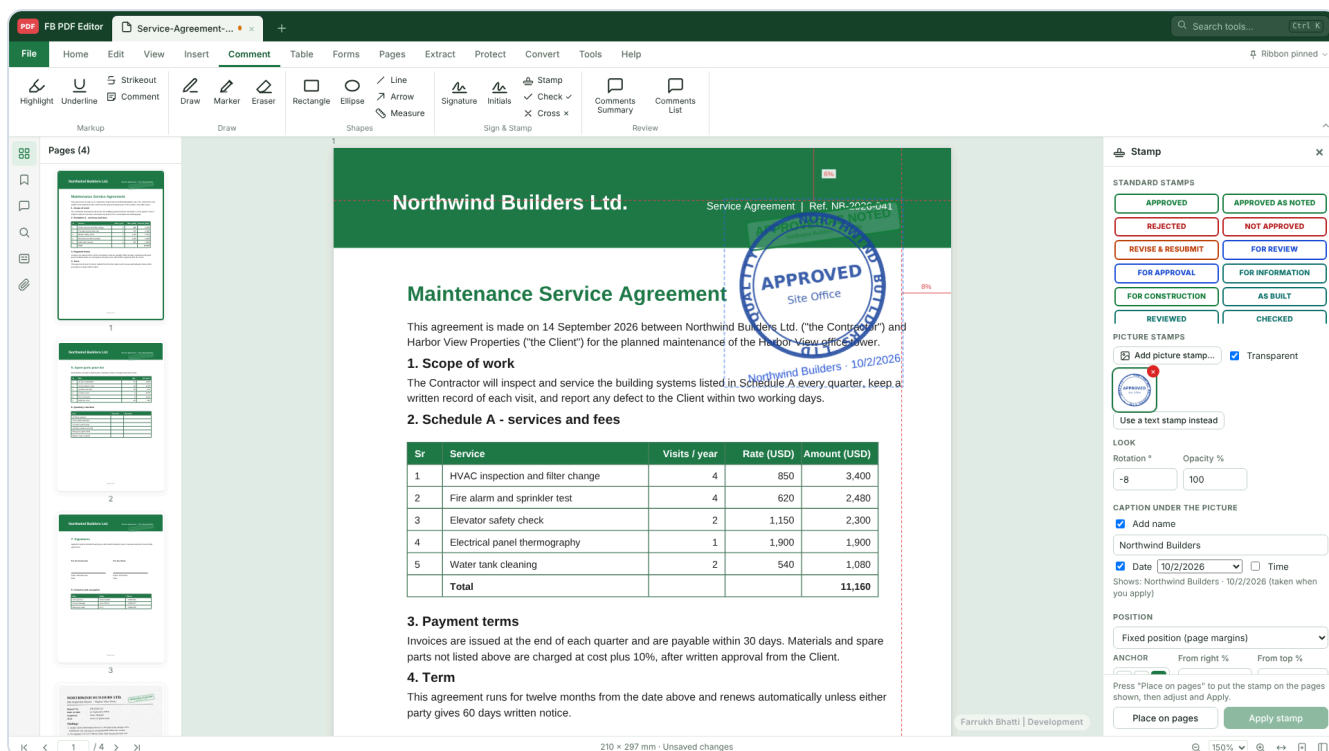

The Stamp pane with the standard stamps and the live preview on the page.

The stamp placed on all pages, still movable until Apply.

Picture stamps (company seal)

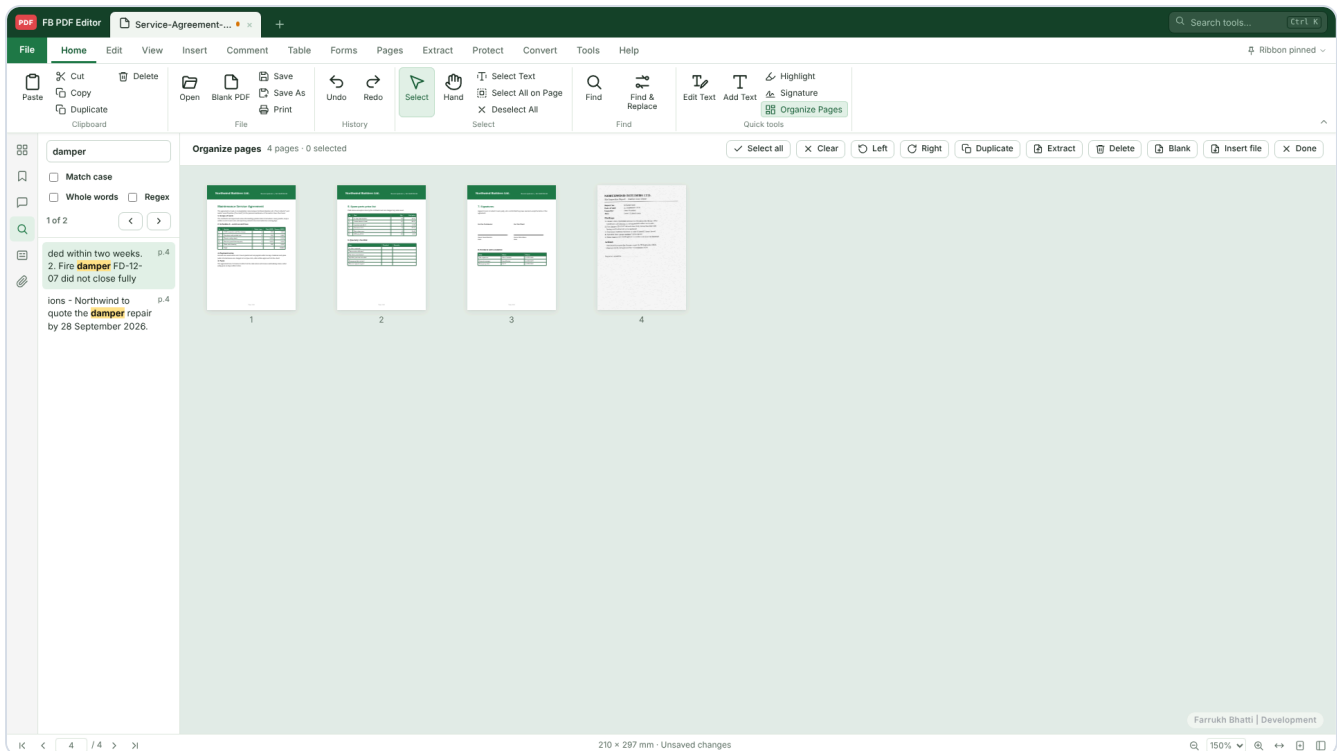

Click **Add picture stamp...** and choose a picture of your seal or stamp. **Transparent** removes the white background. The picture is saved in the pane for next time and can get a date and time caption.

A company seal used as a picture stamp.

09 Organizing pages

Click **Organize Pages** (Home tab, or **Ctrl+Shift+O**) to see all pages as large thumbnails.

Organize pages view.

- Drag thumbnails to change the page order. Select several with **Ctrl** or **Shift**.
- **Left** and **Right** rotate the selected pages; **Duplicate**, **Extract**, **Delete**, **Blank** and **Insert file** are in the same bar.
- Drag PDF, picture, Word or Excel files from File Explorer onto the thumbnails: a blue **Insert here** line shows where they go.
- The **Pages** tab also has Split, Crop, N-up, page numbers, Bates numbers, headers and footers, and watermarks.

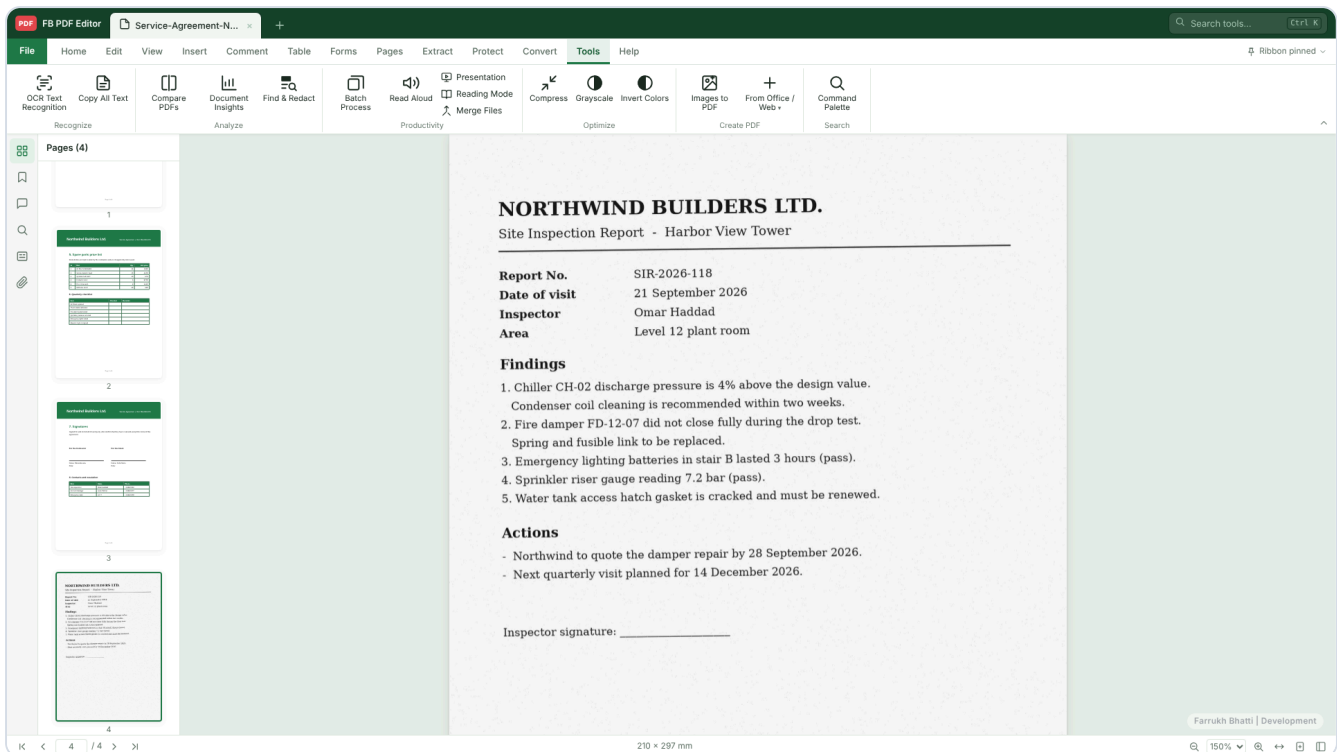

Merging PDFs

Pages > Merge lists files in order. **Add section** inserts a section heading. You can add a cover page before each file or section, and a contents page with linked page numbers. Merging with cover pages and sections is a Pro tool.

10 OCR: scanned PDFs

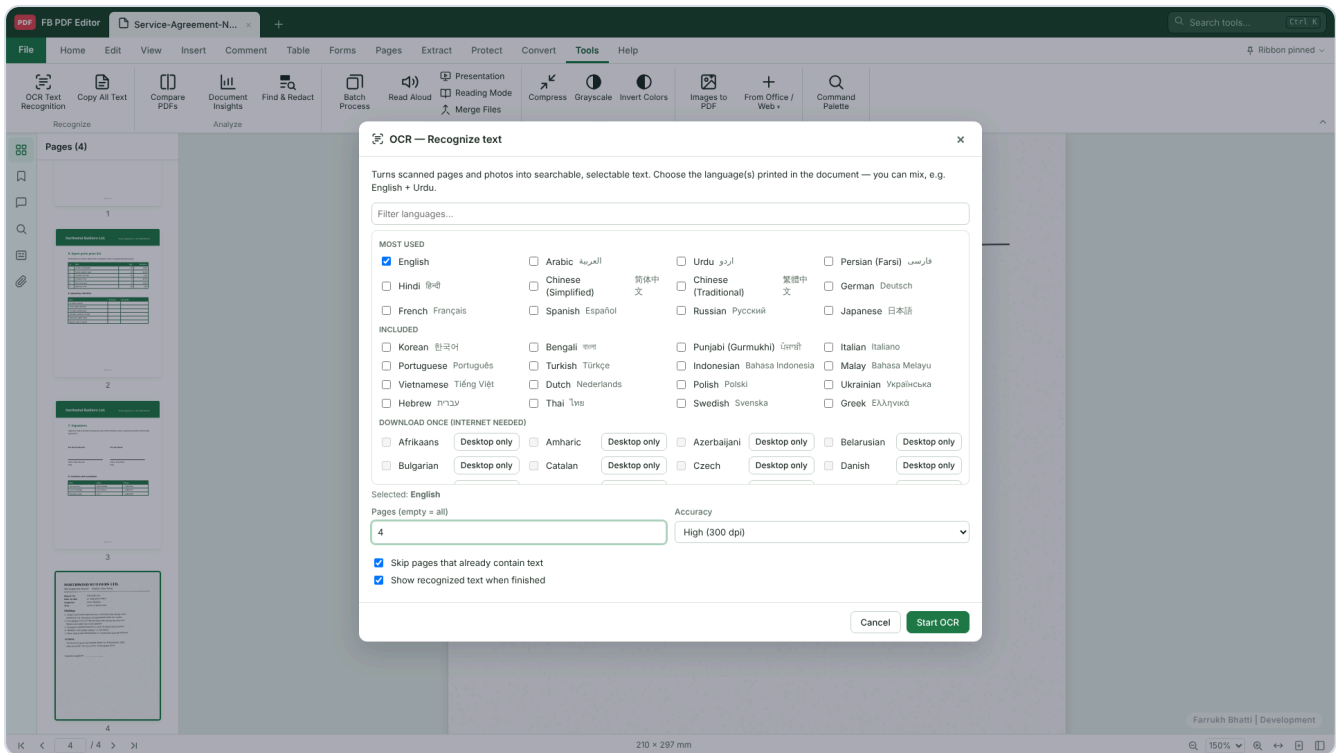

A scanned page is only a picture of text: you cannot search or copy it. **OCR** (optical character recognition) reads the picture and adds real text to the page. Everything runs on your own PC.

PRO OCR is a Pro tool. **Edit Text** can also change words on scanned and outlined pages (version 1.3).

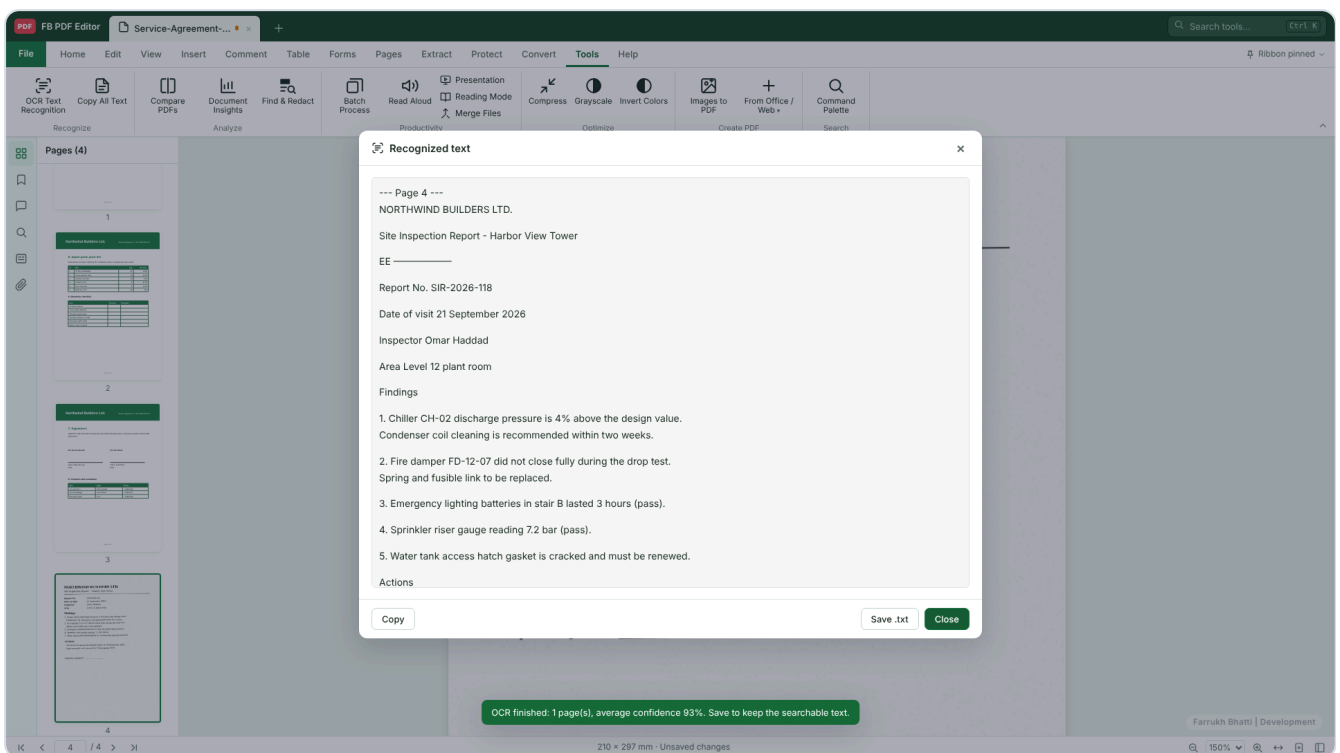

A scanned inspection report: only a picture.

- 1 Open the **Tools** tab and click **OCR Text Recognition**.
- 2 Tick the language(s) on the page. 28 languages are built in, including English, Arabic, Urdu, Persian, Hindi and Chinese. You can mix languages.
- 3 Type the page numbers, or leave **Pages** empty for all pages. Keep **Skip pages that already contain text** ticked.
- 4 Click **Start OCR**. Each page takes a few seconds.
- 5 The recognised text is shown. Click **Copy** or **Save .txt** if you need it.

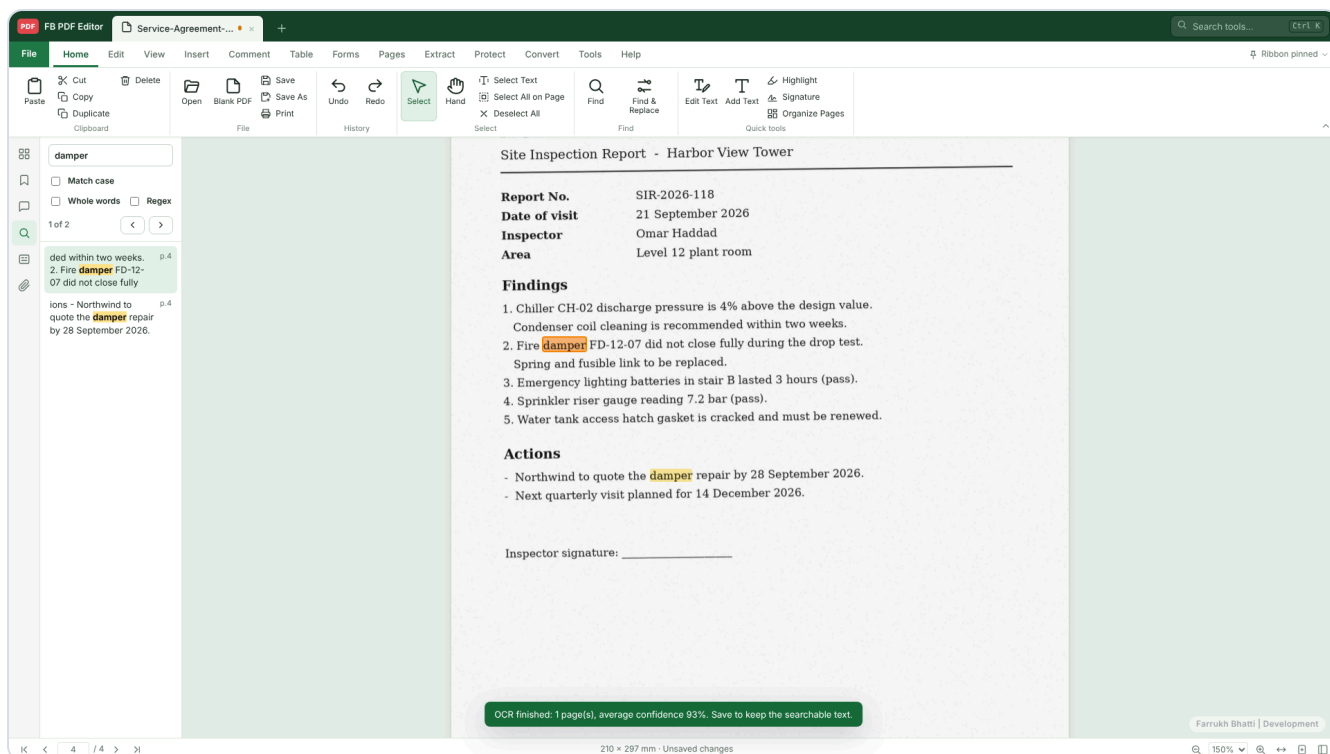

The OCR dialog.

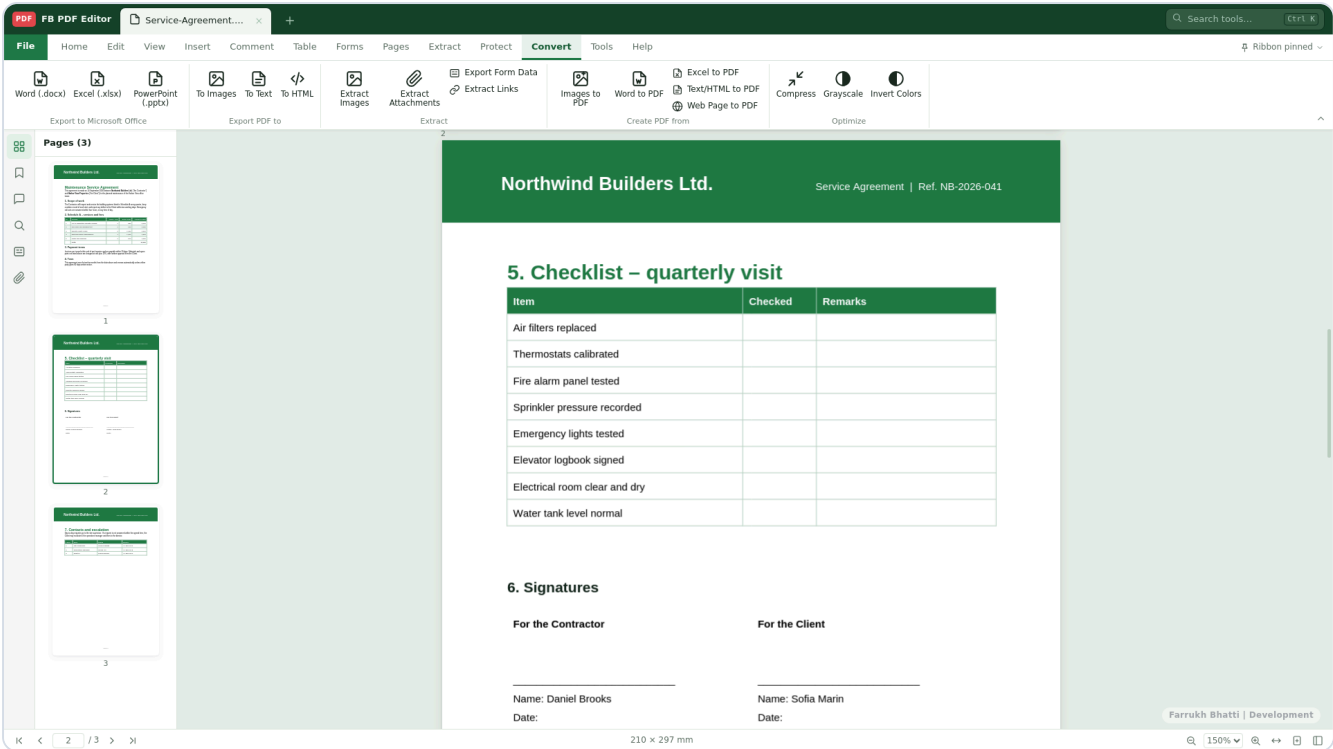

The recognised text.

After OCR, **Find** works on the scan, and **Select Text** can copy lines from it. Save the file to keep the searchable text.

Find now finds words on the scanned page.

11 Converting and exporting

The Convert tab.

Command	Result
Word (.docx), Excel (.xlsx), PowerPoint (.pptx)	Editable Office files. Scanned pages can be read with OCR during export. (Pro)
To Images, To Text, To HTML	Each page as a picture, the text of the document, or a web page.
Images to PDF, Word to PDF, Excel to PDF, Web Page to PDF	Create a new PDF from other files. (Word, Excel and web: Pro)
Compress, Grayscale, Invert Colors	Make the file smaller, black and white, or inverted.

12 Forms, protection and other tools

Forms

Click into the fields of an existing PDF form and type: filling in forms is free. The **Forms** tab can also build fillable forms with 12 field types, detect fields automatically, and import or export form data (Pro).

Protect

- **Redaction** removes text and areas for good, not just covering them (Pro).
- **Password protection** with AES-256 encryption (Pro).
- **Sanitize** removes hidden data such as metadata and attachments (Pro).

Tools

- **Batch process**: watermark, compress or protect many files at once (Pro).
- **Compare PDFs**: visual and text differences between two versions (Pro).
- **Read Aloud**, **Presentation** and **Reading Mode** for reviewing documents.

13 Saving and printing

- Nothing is changed in your file until you **Save** (**Ctrl+S**). **Save As** (**Ctrl+Shift+S**) writes a new file.
- Use **Undo** (**Ctrl+Z**) and **Redo** (**Ctrl+Y**) at any time before saving.
- **Print** (**Ctrl+P**) prints with no watermark, free and Pro.
- The file name in the tab shows a dot while there are unsaved changes.

Upgrading to Pro

- 1 Click **Upgrade to Pro** (or any tool marked PRO).
- 2 The Microsoft Store window opens. Buy once with your Microsoft account. There is no subscription.
- 3 Pro unlocks at once. On another PC signed in with the same Microsoft account, use **Help > FB PDF Editor Pro > Restore purchase**.

14 Keyboard shortcuts

Keys	Command	Keys	Command
Ctrl+O	Open	Ctrl+F	Find
Ctrl+S	Save	Ctrl+Shift+F	Find & Replace
Ctrl+Shift+S	Save As	Ctrl+K	Search tools (command palette)
Ctrl+P	Print	Ctrl+Shift+O	Organize Pages
Ctrl+W	Close document	Ctrl+Shift+N	Go to page
Ctrl+N	Blank PDF	Ctrl+Alt+T	Insert Table
Ctrl+Z / Ctrl+Y	Undo / Redo	Ctrl+B	Add bookmark
Ctrl+= / Ctrl+-	Zoom in / out	Ctrl+D	Document properties
Ctrl+1 / Ctrl+2	Fit page / fit width	Ctrl+Tab	Next document
Ctrl+C / Ctrl+V	Copy / paste objects or images	Ctrl+F1	Pin / unpin ribbon
Delete	Delete selected objects	Esc	Back to Select / close menus
Tab / Shift+Tab	Next / previous table cell	Ctrl+ /	Show all shortcuts

15 Troubleshooting and support

Problem	What to do
A tool asks for Pro after I bought it	Use Help > FB PDF Editor Pro > Restore purchase while signed in to the Microsoft Store with the account that bought it.
Search finds nothing in a scanned file	Run OCR first (Tools tab), then search again.
I cannot move a signature or stamp	It was applied. Applied signatures and stamps are locked for good. Place a new one if needed.
A table is not recognised when I drag over it	The table needs ruled lines. Drag over the whole table, including its borders.
My changes are gone	Changes are only written when you Save . Use Save As to keep the original too.

Privacy

FB PDF Editor runs on your own PC. It does not upload your files, does not need an account and does not collect personal data.

Support

Manuals, training slides and how-to videos: engineeringtoolsfb.com/downloads. For help, use the contact details on engineeringtoolsfb.com or in the Microsoft Store listing.
