

Engineering Tools FB

TRAINING COURSE

Word Properties Editor

Authors, programs and dates of Office files: in one table, in one batch.

What you will learn

- 1 What document properties are
- 2 Load files and folders
- 3 Fill the pools of values
- 4 Set believable date rules
- 5 Randomize or apply exact values
- 6 Save, and check the result

What are document properties?

INSIDE

In the file

Author, Last Saved By, Program, dates: shown in Office under File > Info.

WINDOWS

On the disk

Created, Modified and Accessed dates in File Explorer.

BATCH

All at once

Change hundreds of Word, Excel and PowerPoint files together.

Free and Pro

Free	Pro (one-time)
Add files	Add folders and subfolders
Edit in the table	Randomize from Pool
Apply Specific Pool Values	Extract pools from files
Save 5 files at a time	Unlimited saving and presets

MODULE 01

Files and pools

Load documents and decide which values to use.

01

MODULE 1

The main window

- File buttons and folder scanning
- Pools: one card per property
- Batch operations bar
- Table: one row per file

Word Properties Editor
Inspect, batch edit, and randomize OpenXML metadata (Author, Last Saved, Program) & Windows OS timestamps for Word (.docx), Excel (.xlsx), and PowerPoint (.pptx)

Word Properties Editor · Training

7 / 15

MODULE 1

Date rules

- Created: random in a range, fixed or now
- Modified: offset after Created
- Accessed: offset after Modified
- **Strict order** keeps them in sequence

The screenshot displays the Word Properties Editor interface. At the top, it says "Word Properties Editor" and "Inspect, batch edit, and randomize OpenXML metadata (Author, Last Saved, Program) & Windows OS timestamps for Word (.docx), Excel (.xlsx), and PowerPoint (.pptx)". There are buttons for "Add Single File", "Add Multiple Files", "Add Folder", "Add Multiple Folders", and "Scan Subfolders". A search bar "Filter Files..." is on the right. Below this, there are tabs for "Property Input Pools & Rules", "Separate Lists", "Unified Master List (Author & Modifier Share Pool)", "Edit Master Pool", "Config Date Rules", "Save Pool", and "Pool Options". A "Batch Operations" section includes "Randomize from Pool", "Apply Specific Pool Values", and "Revert".

The main area shows a "Timestamp Generation & Randomization Rules" dialog box. It has two sections: "1. Date Created Rule" and "2. Date Modified Rule (Always Later than Created)". The "Date Created Rule" section has options for "Random Date within Range (Start - End)" (with Start: 2023-01-01 09:00 and End: 2024-06-30 18:00), "Specific Fixed Date & Time" (with Date/Time: 2026-10-02 20:49:50), "Set to Current System Time", and "Keep Original File Date". The "Date Modified Rule" section has an option for "Auto Offset after Date Created (Recommended: +30m to +7 days)" and a checked option for "Strict Chronological Order (Date Created < Date Modified < Date Accessed)".

Below the dialog box, there is a table with columns: Status, File Name, Author, Last Saved By, Date Created, Date Modified, Date Accessed, Size, and Path. The table lists 11 files, all marked as "Modified". The "Date Created", "Date Modified", and "Date Accessed" columns show timestamps that are strictly increasing across the rows, demonstrating the "Strict Chronological Order" rule.

At the bottom, there is a checkbox "Apply to Windows Filesystem Timestamps (Creation, Modified, Accessed)" and a button "Save Changes (11)".

MODULE 02

Batch editing and saving

Randomize, apply exact values and write the files.

02

Randomize from Pool

- 1 Click **Randomize from Pool** ▼
- 2 Selected files or all files
- 3 Changed rows show **Modified**
- 4 **Revert** undoes before saving

☒ Apply to Windows Filesystem Timestamps (Creation, Modified, Accessed)
 ☒ Randomly updated properties for 11 document(s) from candidate pool.

Word Properties Editor 1.0.0 | FB_Tools

Save

- 1 Tick **Windows Filesystem Timestamps**
- 2 **Save All Files**
- 3 Confirm with **Yes**
- 4 Status becomes **Saved**

Prepare a document set

YOUR TASK

- 1 Load a folder of copies of your files
- 2 Add two authors to the Author pool
- 3 Set Created dates for last year
- 4 Randomize all files, check, then save

Check: open one file in Word, File > Info shows the new author and dates.

REMEMBER

Key points

PREVIEW

Nothing until Save

Check the table first. Revert any time before saving.

ORDER

Dates stay logical

Strict order keeps Created < Modified < Accessed.

COPY

Work on copies

Saving writes into the files themselves.

THANK YOU
